WORK EXPERIENCE

Software Developer Engineer 1

Nineleaps

01/2019 – Present

Bangalore, India

- Understanding of machine learning techniques and algorithms i.e Regressions, kNN, Decision Trees & Random Forests, SVM, K-Means clustering, etc.
- Design for scalability, performance, and reliability with cloud-based solutions, especially AWS.
- Undertaking the development of data regression models, using predictive data modeling to deliver insights to complex business problems on large datasets hence improving company's decision making.

Member Of Technical Staff

Nineleaps

08/2018 – 12/2018

Bangalore, India

- Analyzing, discussing upcoming features & working in tandem with onshore clients for on-time delivery.
- Deploying & Integrating APIs (GraphQL and REST).
- Performing SQL DB operations (CRUD, SP & Triggers).
- Practiced the core concepts of C# & Python and familiarized with AGILE methodology.

PROJECT EXPERIENCE

Industry Management through Alexa Skill

- Independent contributor in creating an Alexa skill for HR department which eases the work life.
- ML models used NLP, specifically topic modeling and text classification, by the application of NLTK with about 95% accuracy rate.
- Used AWS environments like S3, Lambda, SNS, SES, DynamoDB, etc. with the current state of the art modeling frameworks: Scikit-Learn and TensorFlow.

Association management solution (AMS)

- Designed and built a multi-tenant SaaS application designed to automate the back-end processes of associations.
- Worked on targeted advertising (recommender systems) and raising supplementary income from donations - achieved north of 30% increase in revenue.
- Implemented critical payment gateways for smooth on-boarding of the client like Bluepay (used in the USA) and PPS.
- Used AWS environments like EC2, Cognito, Lambda, S3, SQS, DynamoDB, Redshift, ElastiCache, etc.

SKILLS

Python

C#

AWS (Amazon Web Services)

EDA (Exploratory Data Analysis)

Statistical Analysis

Feature Engineering

Natural Language Processing

Neural Networks

Tensorflow

GraphQL

REST API

Domain Driven Development (DDD)

AGILE Methodology

JIRA

Git/Perforce

DATABASE

SQL

NoSQL (DynamoDB)

Elastic Search

Redis

EDUCATION

B.Tech/BE

Atria University

08/2014 – 07/2018

Bangalore, India

- Computer Science & Technology

COURSES

Machine Learning by Stanford University

Coursera

Data Science and Machine Learning

Udemy

ACHIEVEMENTS

National Cadet Corps (NCC) Certificate 'C'

National Handball Player

LANGUAGES

English

Hindi
